

# Analysis II

Harsh Prajapati

25.07.26

These notes were prepared between December 2025 and (tentative) (**Last update: January 4, 2026**)

If you find any mistakes or typos, please report them to [caccacpenguin@gmail.com](mailto:caccacpenguin@gmail.com). I would really appreciate it.

I often use informal language to make the ideas easier to grasp, but it's important to keep in mind the formalism and not get too attached to the informal ideas. My goal is to make the material feel approachable, while still respecting the rigour that makes mathematics what it is.

I hope you find these notes helpful :D!

## Textbook Recommendations

These books will serve as our main references:

- Herbert Amann, Joachim Escher, Analysis II, Zweite Auflage, Birkhäuser-Verlag, 2006, Basel
- Otto Forster, Florian Lindemann, Analysis 2, 12. Auflage, 2025
- Walter Rudin, Principles of Mathematical Analysis, 3rd. Edition

Some other great resources.

- K. Königsberger, Analysis 2, 2002
- W. Walter, Analysis 2, 2002
- Heuser, Lehrbuch der Analysis (Teil 2), 2002
- James R. Munkres, Topology, 2nd. Ed., 2000

# Contents

<b>1</b>	<b>Introduction</b>	<b>3</b>
<b>2</b>	<b>Differential Calculus of Several Variables</b>	<b>4</b>
2.1	Vector Spaces . . . . .	4
2.2	Basis and Dimensions . . . . .	4
2.3	Direct Sums . . . . .	4
<b>3</b>	<b>Curve Integral</b>	<b>5</b>
3.1	Matrix Multiplication . . . . .	5
3.2	Systems of Linear Equations . . . . .	5
3.3	Matrices and Elementary Row Operations . . . . .	5
3.4	Row-Reduced Echelon Matrices . . . . .	5
3.5	Invertible Matrices . . . . .	5

# 1 Introduction

## **2 Differential Calculus of Several Variables**

**2.1 Vector Spaces**

**2.2 Basis and Dimensions**

**2.3 Direct Sums**

### **3 Curve Integral**

- 3.1 Matrix Multiplication**
- 3.2 Systems of Linear Equations**
- 3.3 Matrices and Elementary Row Operations**
- 3.4 Row-Reduced Echelon Matrices**
- 3.5 Invertible Matrices**
